CLINICAL EXPERIENCE

Licensed Clinical Psychologist, State of Iowa, License #01004
Licensed Health Service Provider, State of Iowa, License #00475
Credentialed with the National Registry of Psychologists

Current

December, 2012 to Current

Forensic Clinical Psychologist

Stokes and Associates, Psychological and Forensic Services, LLC,
Sioux City, Iowa

- Providing psychological assessment including assessment involving issues of competency, criminal responsibility, criminal offending, assessment of dangerousness and reoffending, and rehabilitation. Offender crimes have involved murder, arson, assault, burglary, bank robbery, fraud, pornography, pedophilia, rape, general sex crimes: contact and non-contact offenses, theft, conspiracy, and drug charges involving conspiracy to manufacture, conspiracy to deliver, DUI's, and possession and ingestion of drugs. Have evaluated special populations to include children, adolescents, seriously mentally ill individuals, and individuals with intellectual deficiencies. Evaluation of witness readiness for trial.
- Providing forensic services including accident reconstruction, crime reconstruction, record review, and providing opinions regarding the potential for malingering in criminal and civil cases. Expert testimony, jury selection, and forensic profiling services.
- Providing psychodiagnostic evaluations, disability evaluations for children and adults, and psychosexual evaluations. Providing forensic interviewing of children and adults who may have been sexually molested as well as sex offender evaluations and risk assessment. Evaluations of parents/caretakers involved with the Department of Human Services. Specialty areas include trauma history, attachment disorders, attention deficit disorders, personality disorders, sexual offending, and addiction disorders.
- Providing direct clinical psychotherapy services to children, adolescents, couples and families. Specialty areas include issues of sexual and physical abuse, PTSD (infidelity, military, acute exposure to event, domestic violence), Reactive Attachment Disorder, learning disabilities and neurological disabilities including ADHD and Fetal Neurotoxic exposure. Special training in assessment and therapy for individuals who are transgendered or questioning gender identity.
- Providing assessment, prevention and treatment services to children and families with addictions, particularly co-occurring disorders, to include eating disorders, self-harm behaviors, gambling, stealing, and impulse control disorders, sex/pornography/internet addiction, gaming addiction and substance use disorders. Specialized training in the assessment and treatment of individuals who have sexual addiction or sexual disorders and treatment of their partners and family.
- Providing consultation to other clinicians as well as institutions, persons involved in the legal system, e.g. lawyers, prosecutors, juvenile court officers and social service agency workers.
- Providing teaching and supervision of undergraduate students and graduate students in the field of

clinical psychology and forensic psychology and interns in the field of substance abuse and addictions (certification as an Advanced Alcohol and Drug Counselor in Iowa is pending approval).

Experience

May, 2006 to December, 2012

Clinical Psychologist

Parkview Psychological Services P.C.
Sioux City, Iowa

- Providing forensic psychological assessment including assessment involving issues of competency, criminal responsibility, criminal offending, assessment of dangerousness and reoffending, and rehabilitation. Worked in Federal Court, State Court, Juvenile Court and through the Department of Health and Human Services.
- Providing psychodiagnostic evaluations, career/vocational assessment, and disability evaluations for children and adults. Providing assessments in workman's compensation claims, sexual and workplace harassment, and consultations to other clinicians as well as institutions.
- Providing direct clinical psychotherapy services to children, adolescents, couples and families. Specialty areas include issues of sexual and physical abuse, PTSD, learning disabilities and neurological disabilities including ADHD as well as dual diagnosis and addictions. Specialty areas involved working with individuals with Gender Identity Disorder, Transgendered clients, and Gay couples.

January 2008 to September, 2011

Clinical Director

Youth Recovery Services, Yankton Sioux Tribe,
Wagner, S. D.

- Director of all Clinical Services for Youth Recovery Services. This is a program to assess and treat youth (age 14 to age 23) in need of services for drug or alcohol abuse, addictions (sexual, gambling, eating) and impulse control disorders as well as Reactive Attachment Disorder and PTSD. The program provided comprehensive and individualized continuum of care for youth and/or family members who have been affected by the disease of addiction. Services were culturally and spiritually appropriate for Native American youth and their families.
- Responsibilities included supervision of chemical dependency trainee staff. Responsibilities also included supervision of Crisis Response Team and Direction of Suicide Prevention and Intervention Task Force.

March, 2007 to September, 2011

Project Director

Tiwahe Wakan, Yankton Sioux Tribe,
Wagner, S.D.

- Responsible for System of Care grant development and implementation functions. This included: developing and supporting all oversight committees, oversight of the creation of the strategic plan, hiring and supervising staff, participating in the identification and selection of partner agencies, supporting development of the administration and organizational structures necessary for implementation in partnering agencies, seeking and valuing ongoing input from youth and families, insuring that core principles such as natural supports and cultural competence are always present, making sure that gaps and barriers across all the systems in the SOC grant are being addressed, utilizing existing expertise from all those involved, ensuring the smooth functioning and quality of grant activities, implementing sound financial practices to ensure fiscal accountability, developing procedures for bringing together multiple funding resources for state and local systems development, evaluating and continuously improving quality, and meeting or exceeding federal grant requirements.
- Supervision of Doctoral level, Master's level, and Bachelor's level clinical staff.

March, 2006 to February, 2007

Lead Evaluator

Tiwahe Wakan, Yankton Sioux Tribe,
Wagner, S.D.

- Directing both the National and local evaluation effort for the Yankton Sioux of South Dakota on the National Evaluation of the Comprehensive Community Mental Health Services for Children and their Families Program. Center for Mental Health Services, Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services.

September, 2004 to June, 2006

Postdoctoral Resident

Student Counseling Center, U.S.D.,
Vermillion, S.D.

*Organized health care setting

Responsibilities:

- Individual, group, couple and relationship counseling. Crisis management of clients with high potential for self-harm. Specialty areas included therapy for Personality Disordered clients, clients with Co-occurring disorders, clients with addictions, and clients with trauma history and diagnoses of PTSD, Borderline Personality Disorder, and other Personality Disorders.
- Therapy services and assessment for clients with substance abuse problems. Assessment and testing for emotional, cognitive, personality, academic, and achievement issues. Case management and rehabilitative and/or accommodation recommendations.
- Forensic assessment and testing as well as treatment for offenders and victims.
- Participation in annual training of Resident Advisors and Hall Directors on mental health, substance abuse and crisis response.
- Supervision of staff and interns (undergraduate level and Master's level).
- Analysis of data programming outcomes for various research projects.
- Coordinated with Judicial affairs to provide services for policy violators including alcohol education classes, chemical use assessments, behavioral assessments, and referrals.
- Coordinated with and referral for continuum of care to local hospitals, treatment, and law enforcement.

September, 2003-August, 2004

Psychology Intern

*APA Accredited Internship

St. Louis Psychology Internship Consortium,
St. Louis, Missouri
Metropolitan St. Louis Psychiatric
Center
St. Louis Psychiatric Rehabilitation
Center
Hawthorn Children's Psychiatric
Hospital and Residential treatment
center
Missouri Institute of Mental Health

Rotations:

Metropolitan St. Louis Psychiatric Center

Clients and setting: Acute, adult inpatient care

- The hospital provides both emergency and acute care for adult inpatients in the Eastern Region of Missouri. Individuals from a highly diverse catchment area that includes rural, urban and suburban populations; the majority of which has less education and fewer resources than the majority. 50% of patients represent minorities, with the majority of those individuals being African-American.
- The hospital is a treatment and training institution with which Washington University's School of Medicine, Department of Psychiatry is affiliated. Axis I disorders such as the schizophrenias and affective disorders were the most frequent diagnoses, many patients also presented with substance

abuse and Axis II disorders. Many clients, both male and female, had sexual and/or physical abuse histories.

St. Louis Psychiatric Rehabilitation Center

Clients and setting: Long-term adult care in a forensic setting. Majority of the patients hold the status NGRI (Not Guilty by Reason of Insanity)

- Forensic evaluation and treatment/rehabilitation, in minimum security areas, provided for patients committed by court order. These defendants may be referred for outpatient evaluation of their competency to stand trial and of their probable mental state at the time of an alleged offense, or treatment following a finding of incompetence to stand trial (IST) or a verdict of Not Guilty by Reason of Insanity (NGRI). These patients have severe and persistent mental illnesses, including Axis I and Axis II disorders. (Major mental illness and Personality Disorders).
- Participation in a specialty rotation in Forensics. Involved in the evaluation and treatment related to risk of dangerousness, and provision of treatment services, including individual therapy, responsibility therapy group and sex offenders group. In addition, provision of court-ordered evaluations and treatment services to criminal defendants within the jurisdiction of the seven circuit courts of the Eastern Region of Missouri. Services performed under supervision of Certified Forensic Examiner included pretrial evaluation to determine competency to stand trial, criminal responsibility and other matters related to criminal defendants, such as rendering opinions as to whether a sexual offender should be civilly committed as a Sexually Violent Predator.
- Participation in the Cognitive Rehabilitation program; this involves skills training and psychosocial rehabilitation for individuals diagnosed with Schizoaffective disorder or Schizophrenia, who held NGRI status.

Hawthorn Children's Psychiatric Hospital and Residential Treatment Center

Clients and setting: Child/adolescent acute care

- Youth are hospitalized who are assessed to be dangerous to themselves or others or who are adjudged to have an under-controlled severe psychiatric disturbance which so imperils their judgment or capacity to control behavior that a non-specific risk is posed. Disorders included among the patient population include acute post-traumatic stress disorder, bipolar disorder, schizophrenia, psychotic disorders, developmental disorders, learning disabilities, developing personality disorders. Life circumstances involve extreme psychosocial stressors, frequently physical and sexual abuse and neglect.
- The Day Treatment program (co-operative venture between the Department of Mental Health and Special School District) involves co-leadership in groups and family therapy with students. Youth in this program commonly have developmental disorders on the spectrum of pervasive developmental disorders as well as other co-morbid conditions.

Missouri Institute of Mental Health

Clients and setting:

The Missouri Institute of Mental Health is a center for policy, research and training, and is part of the School of Medicine at the University of Missouri-Columbia. It exists to conduct research that will improve services for persons served by the Department of Mental Health and to foster excellence in mental health services through employee training and the study of mental health policy and ethics.

- Developed a treatment program evaluation for the Cognitive Rehabilitation program for patients with schizophrenia at SLPRC.
- Conducted a data analyses to examine person/agency attitudes on the implementation of dual diagnoses programs in the state of Missouri.
- Training facilitator on the education of the impact of abuse history in inpatient settings; participated in an interview that is used nationwide for training purposes and wrote summaries and questions for the training. The segment is used for training medical personnel working in inpatient settings.
- Involved in research involving gender differences in education as impacting the development of

software training on substance abuse.

September, 2002 – August, 2003

Chemical Dependency Counselor Trainee
South Dakota

Student Counseling Center, U.S.D., Vermillion,

Clinical Psychology Trainee
